

Your Trusted Analytics and Planning Partner

Packaged BW Upgrade Offerings based on best practices

TekLink provides BW upgrade offerings that far exceeds the industry offerings in terms of value with many years of unparalleled technical excellence

Solution Highlights

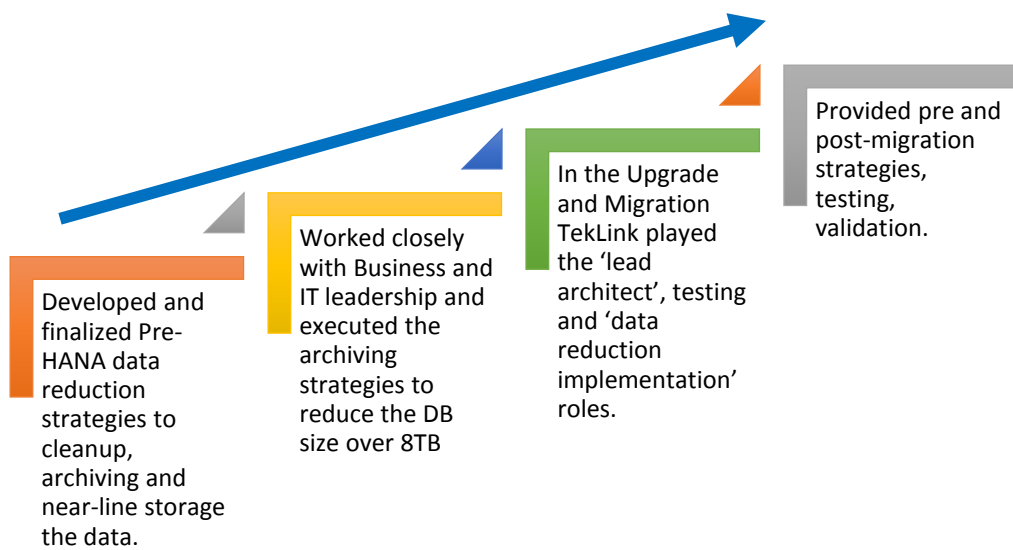

- Aligned with your BI vision
- Risk vs Benefit is analyzed
- Experience from n+upgrades ranging from BW only to BW on HANA, HANA platforms
- Pre upgrade / house keeping tasks are covered
- Performance issues are covered

Upgrade Case Study Highlights...

1. High performance analytics foundation for their entire BI & Analytics.
2. SLA improvements. Real-time updates from SAP ECC for future analytical solutions and applications.
3. Data reduction strategies (cleanup, archiving and near-line storage) to help reduce the HANA footprint prior to migration.
4. Strategies for LSA++ based optimization post-migration.

“Absolutely delighted to have TekLink involved – Our BW upgrade was smooth and flawless”

---- Director, BI Analytics & Reporting

Developed and finalized Pre-HANA data reduction strategies to cleanup, archiving and near-line storage the data.

Worked closely with Business and IT leadership and executed the archiving strategies to reduce the DB size over 8TB

In the Upgrade and Migration TekLink played the 'lead architect', testing and 'data reduction implementation' roles.

Provided pre and post-migration strategies, testing, validation.
